cremation society of mid michigan obituaries: Information Arts Stephen Wilson, 2003-02-28 An introduction to the work and ideas of artists who use—and even influence—science and technology. A new breed of contemporary artist engages science and technology—not just to adopt the vocabulary and gizmos, but to explore and comment on the content, agendas, and possibilities. Indeed, proposes Stephen Wilson, the role of the artist is not only to interpret and to spread scientific knowledge, but to be an active partner in determining the direction of research. Years ago, C. P. Snow wrote about the two cultures of science and the humanities; these developments may finally help to change the outlook of those who view science and technology as separate from the general culture. In this rich compendium, Wilson offers the first comprehensive survey of international artists who incorporate concepts and research from mathematics, the physical sciences, biology, kinetics, telecommunications, and experimental digital systems such as artificial intelligence and ubiquitous computing. In addition to visual documentation and statements by the artists, Wilson examines relevant art-theoretical writings and explores emerging scientific and technological research likely to be culturally significant in the future. He also provides lists of resources including organizations, publications, conferences, museums, research centers, and Web sites.

cremation society of mid michigan obituaries: A Pack of Lies John Arundel Barnes, 1994-06-09 Defining lies as statements that are intended to deceive, this book considers the contexts in which people tell lies, how they are detected and sometimes exposed, and the consequences for the liars themselves, their dupes, and the wider society. The author provides examples from a number of cultures with distinctive religious and ethical traditions, and delineates domains where

lying is the norm, domains that are ambiguous and the one domain (science) that requires truth-telling. He refers to experimental studies on children that show how, at an early age, they acquire the capacity to lie and learn when it is appropriate to do so. He reviews how lying has been evaluated by moralists, examines why we do not regard novels as lies and relates the human capacity to lie to deceit among other animal species. He concludes that although there are, in all societies, good pragmatic reasons for not lying all the time, there are also strong reasons for lying some of the time.

cremation society of mid michigan obituaries: The Article V Amendatory Constitutional Convention Thomas E. Brennan, 2014-10-08 This book describes the process of amending the federal constitution as defined in Article V by means of a convention for proposing amendments. It shows that the constitution can be amended in two ways: either by ratifying an amendment proposed by the Congress or by ratifying an amendment proposed by a convention. Article V requires the Congress to call a convention whenever the legislatures of two thirds of the states request one. The federal constitution has been amended twenty-seven times. All 27 amendments were proposed by the Congress. There has never been an Article V amendatory constitutional convention in the 230 year history of the nation. Over the years, every state in the union has asked for a convention at one time or another. Congress has never acknowledged those requests or evaluated them. The history of the 1787 constitutional convention in Philadelphia shows that the founders intended the Article V convention to be a means for the states to seek amendments which the Congress refuses to consider. The book describes the efforts of a number of citizens groups that are trying to get an Article V convention, and it describes the weaknesses and strengths of each. It comes to several conclusions: A. That the Congress will never voluntarily call a convention no matter how many petitions are received, because a convention might propose amendments which would decrease the powers or prerogatives of Congress. B. That the states have the right to call an Article V convention without the concurrence of the Congress whenever two-thirds of the states wish to participate. C. That citizens of the several states have the constitutional right to organize a convention for proposing amendments, without the call of Congress or the approval of the state legislatures. D. That no amendment proposed by a convention, of any kind, will become a part of the federal constitution unless it is ratified by three quarters of the states, as required by Article V. The book urges the convening of a constitutional convention by the voluntary action of citizens, and recommends a number of matters that should be on its agenda.

cremation society of mid michigan obituaries: Civil Rights in Black and Brown Max Krochmal, Todd Moya, 2021-11-09 Not one but two civil rights movements flourished in mid-twentieth century Texas, and they did so in intimate conversation with one another. Far from the gaze of the national media, African American and Mexican American activists combated the twin caste systems of Jim Crow and Juan Crow. These insurgents worked chiefly within their own racial groups, yet they also looked to each other for guidance and, at times, came together in solidarity. The movements sought more than integration and access: they demanded power and justice. *Civil Rights in Black and Brown* draws on more than 500 oral history interviews newly collected across Texas, from the Panhandle to the Piney Woods and everywhere in between. The testimonies speak in detail to the structure of racism in small towns and huge metropolises—both the everyday grind of segregation and the haunting acts of racial violence that upheld Texas's state-sanctioned systems of white supremacy. Through their memories of resistance and revolution, the activists reveal previously undocumented struggles for equity, as well as the links Black and Chicana organizers forged in their efforts to achieve self-determination.

When the city planned to build a zoo, the mayor asked Cinchett to design the new sign. Fried chicken king Colonel Sanders had the sign company create all the neon work for his first two Kentucky Fried Chicken restaurants in Central Florida, and soon after, other reputable businesses came calling.

cremation society of mid michigan obituaries: Pieces of Grace Karen Gibson, 2021-03-13

Grace believed she went from losing it all to having it all. In a desperate attempt to put her life back together, Grace, divorced and jobless, leaves Tucson to return to Chicago-a place she never planned to call home again. She also never planned to fall for Benjamin Hayward. Drawn into the fairytale existence of his power and wealth, Grace is unable to see what her family and friends see, and ignores the warning signs of Dr. Benjamin Hayward's dark side. Benjamin's secrets-the death of his mentally ill wife and the disappearance of his daughter-push Grace into an abyss deeper than the one that brought her home in the first place, and she risks losing even more. Pieces of Grace is a complicated story of relationships confused by undercurrents of mental illness. Readers find themselves hoping family and friends can carry Grace through her most difficult moments.

cremation society of mid michigan obituaries: *The Changing Face of Death* Glennys Howarth, Peter C. Jupp, 2016-07-27 The taboo on death is at last breaking down. There is far greater receptivity to informed discussion about death and dying. Dying with dignity is one major issue: euthanasia and the 'natural death movement' are the latest stages in a debate first stimulated by the hospice movement. Media treatment of the bereaved, especially after disasters, has attracted some adverse criticism, yet after the decline of traditional customs of mourning, people seek new models of acceptable behaviour at a time of death. The book argues that attitudes to death and to disposal are culturally formed and examines the factors in the formation and decline of such attitudes by analysing specific issues over four centuries of death.
