crime scene training for law enforcement: CRIME SCENE STAGING Arthur S. Chancellor,

Grant D. Graham, 2016-12-02 This unique text has been written as a practical reference for detectives, crime scene investigators, and prosecutors on how to recognize a staged scene and how this offender behavior could be used as evidence in subsequent trials. The book is designed to help those actively engaged in conducting criminal investigations identify the red flags or those common findings at a crime scene that point to the scene being staged or altered and thereby assist the investigative process. The text is not only research based but also includes the authors' 30-year experience and personal observations in conducting hundreds of different crime scene investigations ranging from homicide and death, burglary and other property crimes, to rape and other sexual crimes. This experience also includes interviewing hundreds of victims and suspects, and conducting investigations from initiation of cases through prosecution. The authors have located hundreds of examples of staging and have included many of them as case studies throughout the text. Many of the case studies presented are based on the authors' personal involvement in them. In addition to defining and categorizing the various aspects of staging, the reader is also introduced to new terminology describing the different elements of staging based on offender motive and the dynamics of the events. Other major discussions include primary and secondary staging as well as the two subcategories of primary staging: premeditated and ad hoc staging. Staging by individuals other than the offender and victim, described as tertiary/incidental scene alterations, are included as are several chapters on a variety of crimes and how to identify the red flags relevant to them. A final chapter is written especially for prosecutors and offers suggestions and references on how the concept of staging might be introduced in court. A very thorough Appendix provides reviews of many appellate court decisions from across the U.S. and Canada specifically addressing issues of staging.

crime scene training for law enforcement: *The Nutshell Studies of Unexplained Death* Corinne May Botz, 2004-09-28 *The Nutshell Studies of Unexplained Death* offers readers an extraordinary glimpse into the mind of a master criminal investigator. Frances Glessner Lee, a wealthy grandmother, founded the Department of Legal Medicine at Harvard in 1936 and was later appointed captain in the New Hampshire police. In the 1940s and 1950s she built dollhouse crime scenes based on real cases in order to train detectives to assess visual evidence. Still used in forensic training today, the eighteen Nutshell dioramas, on a scale of 1:12, display an astounding level of detail: pencils write, window shades move, whistles blow, and clues to the crimes are revealed to those who study the scenes carefully. Corinne May Botz's lush color photographs lure viewers into every crevice of Frances Lee's models and breathe life into these deadly miniatures, which present the dark side of domestic life, unveiling tales of prostitution, alcoholism, and adultery. The accompanying line drawings, specially prepared for this volume, highlight the noteworthy forensic evidence in each case. Botz's introductory essay, which draws on archival research and interviews with Lee's family and police colleagues, presents a captivating portrait of Lee.

crime scene training for law enforcement: *Report Writing for Crime Scene Investigators* Laura Pazarena, Michael Kessler, Amy Watroba, 2022-06-29 Report Writing for Crime Scene Investigators provides students with the tools to write effective crime scene reports. Students

looking to break into the field of crime scene investigations often take courses in report writing but the textbooks available are commonly geared toward general law enforcement and first responders. However, none of the books on the market focus on the craft of effective, informative writing with graphic crime scene-specific considerations in mind. While falling under law enforcement's purview, crime scene investigations fall within the forensic science field, and, as such, the reporting required is more technical and often more scientific in nature than the average police report. Due to the lack of published resources and guidance in this critical area, there is no standard that currently exists for vital function within crime scene and investigative circles—and often the subject is given short shrift. This creates wide discrepancies among what students are being taught. This book is the first of its kind to provide students, and those professionals and agencies in need of a blueprint, with a resource to teach them the various types of reports—and how to refer to scenarios and specific types of evidence—to ensure that the report holds up under the process of an investigation and for use within the courts. Key features: Outlines the key distinctions between police-style reports and crime scene-style reports and writing Explains how to clearly and accurately provide an accounting and description of a variety of evidence recovered from a scene Details how to best organize the report in a logical manner and sequence, including the various components of the crime scene report Presents an explanation of the information that should be included in the report, and the rationale behind its importance, for testimonial purposes Report Writing for Crime Scene Investigators provides to the reader the fundamentals of effective report writing for the active field Crime Scene Investigator. Coverage includes the necessary steps to thoroughly document scenes and evidence—from the time the CSI receives the call until the time the CSI testifies in court. In addition to the student market, the book will be a welcome resource for professional crime scene investigators, attorneys, and as a reference and standard for professional training programs.

crime scene training for law enforcement: *Strengthening Forensic Science in the United States* National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
