dayton board of education: The Individual, Society, and Education Clarence J. Karier, 1986

This is an updated version of Karier's highly regarded *Man, Society, and Education*, which focuses on the concepts of human nature and community throughout American educational history. For the new edition, Karier has added chapters on the major movements in American education from World War II to the present and on the major Supreme Court cases involving educational policy during the same period. This classic volume remains a remarkable study in the history of ideas into which the implications for American schooling have been deftly woven. It is balanced, thorough, and intelligently challenging. --- Ann M. Keppel, College of Education, University of Hawaii at Manoa
This new edition should have great use as a primary text at the graduate and advanced undergraduate levels. --- Peter A. Sola, School of Education, Howard University

dayton board of education: Politics, Race, and Schools Joseph Watras, 2013-11-26 First

Published in 1997. Focusing on a case study from the civil rights movement, the author illuminates the issues and problems that emerge when schools are used to advance social equality. He examines the political controversies surrounding the racial desegregation of public and private schools in Dayton over a 40-year period during which the city initiated several nationally recognized programs to overcome segregation. The book also discusses racial integration in public and religious schools in different parts of the United States during that time. It describes experiences in public schools, Catholic schools, and private schools covering individually guided education, ethnic studies, magnet schools, compensatory education, and the New Futures Program funded by a private foundation. The text is innovative in its survey of the relationships between city administrators, public school officials, and Catholic and private school educators. It also provides important analysis of how curriculum changes have affected desegregation and examines the role of private philanthropies in education.

dayton board of education: An African American Dilemma Zoë Burkholder, 2021-07-05 An

African American Dilemma offers the first social history of northern Black debates over school integration versus separation from the 1840s to the present. Since *Brown v. Board of Education* in 1954 Americans have viewed school integration as a central tenet of the Black civil rights movement. Yet, school integration was not the only--or even always the dominant--civil rights strategy. At times, African Americans also fought for separate, Black controlled schools dedicated to racial uplift and community empowerment. *An African American Dilemma* offers a social history of these debates within northern Black communities from the 1840s to the present. Drawing on sources including the Black press, school board records, social science studies, the papers of civil rights activists, and court cases, it reveals that northern Black communities, urban and suburban, vacillated between a preference for either school integration or separation during specific eras. Yet, there was never a consensus. It also highlights the chorus of dissent, debate, and counter-narratives

that pushed families to consider a fuller range of educational reforms. A sweeping historical analysis that covers the entire history of public education in the North, this work complicates our understanding of school integration by highlighting the diverse perspectives of Black students, parents, teachers, and community leaders all committed to improving public education. It finds that Black school integrationists and separatists have worked together in a dynamic tension that fueled effective strategies for educational reform and the Black civil rights movement, a discussion that continues to be highly charged in present-day schooling choices.

dayton board of education: *Black Mayors, White Majorities* Ravi K. Perry, 2022-07-19 Recent years have seen an increase in the number of African Americans elected to political office in cities where the majority of their constituents are not black. In the past, the leadership of black politicians was characterized as either deracialized or racialized--that is, as either focusing on politics that transcend race or as making black issues central to their agenda. Today many African American politicians elected to offices in non-majority-black cities are adopting a strategy that universalizes black interests as intrinsically relevant to the needs of their entire constituency. In *Black Mayors, White Majorities* Ravi K. Perry explores the conditions in which black mayors of majority-white cities are able to represent black interests and whether blacks' historically high expectations for black mayors are being realized. Perry uses Toledo and Dayton, Ohio, as case studies, and his analysis draws on interviews with mayors and other city officials, business leaders, and heads of civic organizations, in addition to official city and campaign documents and newspapers. Perry also analyzes mayoral speeches, the 2001 ward-level election results, and city demographics. *Black Mayors, White Majorities* encourages readers to think beyond the black-white dyad and instead to envision policies that can serve constituencies with the greatest needs as well as the general public.

dayton board of education: *Beyond Busing* Paul R. Dimond, 2009-01-20 A compelling insider's account of the fight for educational desegregation, from one of its most dedicated and outspoken heroes. A new afterword explains the author's controversial belief that the moment for litigating educational equality has passed, clear-sightedly critiquing his own courtroom strategies and the courts' responses, before closing with an assessment of the economic and social changes that he feels have already moved us beyond busing. An extraordinarily informative and thoughtful book

describing the process of bringing Brown [v. Board of Education] North and the impact this process had upon national attitudes toward desegregation. --Drew S. Days III, Yale Law Journal An original analysis of a tough subject. A must-read for all who care about opportunity for all our children. --Donna E. Shalala, President, University of Miami Paul Dimond remains a passionate and caring voice for inner-city students, whether in his advocacy of school desegregation, school choice plans, or school finance reform. He illuminates these issues as one who participated in the major education cases and as a perceptive scholar. --Mark Yudof, Chancellor, The University of Texas System A must-read for anyone who wants to understand America's continued failure to give inner-city children a quality education or to do something about it! --Sheryll Cashin, Author of The Failures of Integration: How Race and Class Are Undermining the American Dream Dimond is particularly good at relating his slice of legal history to the broader developments of the 1970s, and his occasional remarks about trial tactics are amusing and instructive. Dimond's honesty about both his successes and failures makes his book required reading for civil rights lawyers. --Lawrence T. Gresser, Michigan Law Review A fascinating first-hand account of 1970s northern school desegregation decisions. --Neal E. Devins, American Bar Foundation Research Journal Dimond reminds the liberal reader of the promise that lies in the empowerment of ordinary families to choose their own schools. --John E. Coons, Professor of Law, Emeritus, University of California, Berkeley Paul R. Dimond is counsel to Miller, Canfield, Paddock and Stone, Michigan's largest law firm; chairman of McKinley, a national commercial real estate investment and management firm; and chairman or member of the board of trustees of numerous education, community, and civic organizations. He spent four years as President Clinton's Special Assistant for Economic Policy.

dayton board of education: Grand Plans Judith Sealander, 2014-10-17 Scholars may have widely differing views of the Progressive Era, but all see business as holding the key to the reforms of that period. In this new book Judith Sealander amplifies our understanding of the relationship between business leaders and reform through a detailed examination of Dayton and the Miami Valley of Ohio. She focuses specifically on four progressive projects that made this nine-county region nationally known as a center for reform activism. The four projects include an extensive program of employee benefits instituted at the National Cash Register Company; the creation, in the Miami Conservancy District, of a massive flood prevention system; the institution of a new businesslike city-manager government in Dayton; and a new experimental approach to education in the region's public and private schools. Well grounded in the scholarly literature on progressivism and drawing from a rich trove of local manuscript sources, Judith Sealander has provided an integrated analysis of the role of business leadership in these four reform areas that corrects the exaggerated treatment business has often received. She shows how this one group of businessmen functioned as reformers, the grand plans they had for changing society, their merger of scientific engineering, business management, and moral fervor, and the benefits and costs of their kind of progressivism. *Grand Plans* contributes new insights into the Progressive Era and will interest scholars of that period as well as historians of American business, urban affairs, and reform.
