**dc financial services america llc sacramento ca: LASTING SOLUTION TO OIL-AND-FOOD CRISES** STEVE Dr. ESOMBA, 2012-05-29 Since the mid-1980s or even earlier, the global economy has continuously been plagued by one energy and food crisis or another. The ups and downs of the energy industry and market buoy and bubble along with food commodity prices. Every slight movement backwards or forward of crude features impacts food commodity prices on which the poor as well as the rich depend on for survival. This umbilical link between oil prices and food prices tortures our swelling populations, especially those in poor, underdeveloped countries. LASTING SOLUTIONS TO OIL-AND-FOOD PRICES is a bold attempt to address permanent solutions to this appalling situation. More ideas are needed, and much more bolder action. tWe must tackle these perpetual oil-and-food problems. Our populations keep increasing.Many teeming mouths to feed. Your contribution is welcome. Thanks.

**dc financial services america llc sacramento ca: Managing Climate Risk in the U.S. Financial System** Leonardo Martinez-Diaz, Jesse M. Keenan, 2020-09-09 This publication serves as a roadmap for exploring and managing climate risk in the U.S. financial system. It is the first major climate publication by a U.S. financial regulator. The central message is that U.S. financial regulators must recognize that climate change poses serious emerging risks to the U.S. financial system, and they should move urgently and decisively to measure, understand, and address these risks. Achieving this goal calls for strengthening regulators' capabilities, expertise, and data and tools to better monitor, analyze, and quantify climate risks. It calls for working closely with the private sector to ensure that financial institutions and market participants do the same. And it calls for policy and regulatory choices that are flexible, open-ended, and adaptable to new information about climate change and its risks, based on close and iterative dialogue with the private sector. At the same time, the financial community should not simply be reactive—it should provide solutions. Regulators should recognize that the financial system can itself be a catalyst for investments that accelerate economic resilience and the transition to a net-zero emissions economy. Financial innovations, in the form of new financial products, services, and technologies, can help the U.S. economy better manage climate risk and help channel more capital into technologies essential for the transition. <https://doi.org/10.5281/zenodo.5247742>

**dc financial services america llc sacramento ca: Telehealth in Rural Hospitals** CJ Rhoads, 2017-07-27 Improving the quality of healthcare, while increasing accessibility and lowering costs, is a complex dilemma facing rural communities around the world. The Center for Rural Pennsylvania believed that telehealth, the use of electronic information and telecommunications technologies to support long-distance clinical healthcare was a viable solution so it recently provided grants to conduct a thorough investigation into the factors involved. Telehealth in Rural Hospitals: Lessons Learned from Pennsylvania reports the outcome of this year-long investigation. Illustrating telehealth implementations in rural settings, it supplies an overview of telehealth as well as an assessment of its economic impact. The book skillfully intertwines the research and academic aspects of telehealth with helpful insights from the author. One of the most important discoveries made by the author and her team of researchers is that all too often money is wasted by implementing telehealth for services that don't impact many people. This book shares valuable insights on using telehealth for integrative health practices that could improve the health of a greater portion of the population. This book illustrates how telehealth can, indeed, be the healthcare savior that some people believe it will be, but only under the right circumstances. It details exactly what those circumstances are so that everyone, including clinicians, patients, government entities, and vendors, can steer toward the best future path. The author identifies the obstacles preventing wider implementation of telehealth and explains how recent federal legislation will affect telehealth implementation in rural communities. She also points out the folly of developing electronic health

records before federal data standards are put into place.
